Go for It!

Cleveland Community College
Shelby, N.C.

"The smell of black powder is what lured me," says Brian Bass, "it just got in my blood." Brian has been building and shooting muzzleloading rifles and pistols since the early seventies and finds a lot of comradarie among fellow enthusiasts. Brian holds a full time job as an electrician and has just finished his degree in electronics engineering at Cleveland Community College - helping him move forward in his career.

The color section of this years annual is devoted to a look at another side of the students and faculty here at Cleveland Community College. We normally think of a faculty member only as a teacher, and a student as someone who takes our courses. However, as individuals, we are much more than that. We are multitalented.

On the next sixteen pages you will see the other side of these people - their hobbies - their passions. We hope you enjoy what you see!

Volume 23 1991 Bridge

Whitewater Challenge....

Danny Scruggs is not afraid to face a challenge. Throughout the week he takes on the task of being the Department Head in the ever changing world of Computer Technology at Cleveland Community College. But that's not the only challenge he faces. In his spare time he enjoys the "Whitewater Challenge."

Danny started canoeing with partners for about six months, then decided to go solo. He built a decked canoe (a canoe with a cover) and

launched out on his own. He found the decked canoe cumbersome and confining.

While on a trip to Asheville, Danny rented a kayak and found the performance and response overwhelming. "The difference between canoeing and kayaking can be compared to the difference between driving a truck and a sports car. The kayak is the whitewater craft," says Danny, and watching him in these rapids would make a believer out of anyone, especially if you had the chance to see him kayaking upside down. Of course there was some doubt as to whether he intended to do it that way or not (naturally he said he did, and since he came back up, we assume he's right)!

For Danny, the adrenalin rush and the chance to "see the unspoiled beauty of God's creation" makes kayaking a challenge he gladly meets.

"How now, brown cow?".....

Laura Shuford is a student with a mission. Her mission is not only to finish her Pre-Education curriculum at Cleveland Community College, but also to improve life.

Laura was appalled by the treatment of young calves that are raised for veal and decided to take action. That action has become a hobby of sorts but more of a passion of the heart. She tends to them like they were her children, even bottle feeding them, not to mention all

the petting and grooming they get.

Wherever possible she and her husband buy these young calves and raise them until they are about three years old before they sell them. Of course they are sold for beef, but at least they are saved from such a youthful death.

Because of her care and a giant milk bottle, Laura's calves can say, "Life is g-O-O-D!"

"Ultralight flying-the ultimate

In 1976 Mike McSwain, CCC Electronics Instructor, read an article about hang gliding and thought that he would like to try it. So he did. Then he taught himself to fly and for three years thats as far as it went - but he got tired of it. It was a lot of trouble to find someone to go with you to pick you up in a car at some distant spot and he didn't feel like he got to spend enough time in the air.

A couple of years later he bought and restored an ultralight aircraft, actually just a motorized hang glider and once again taught himself to fly it. "It wasn't a smart thing to do," admits Mike now, "but in those early days it was about the only alternative. A lot of people got killed trying to teach themselves. There weren't any two seat planes available for instructors to fly in."

"An ultralight is less expensive to operate and maintain and are a lot more fun than regular airplanes," says Mike, "and are not as restrictive as to where you can fly. You're more out in the open, flying lower, slower and with a better view and better response. Besides, I like to chase rabbits and deer. It's an undescribable sensation - it's the ultimate freedom - no stop signs - no speed limits."

Mike can take off and land with only 300-400 feet of smooth pasture, which he frequently does from the State Line Ultraport on 221A at the North and South Carolina state line just south of Cliffside, N.C. where Mike and about a dozen other ultralight enthusiasts store their aircraft and fly out of on week-ends. His current plane is federally registered as an experimental aircraft due to the fact that it has seats for two people. A true ultralight only has room for the pilot. He now holds his private pilot license (a requirement for flying with a passenger).

The only really hair-raising experience was when he flew into the edge of a thunderstorm one time. The best way to describe his feelings about that was "out of control". "It's something I'd just as soon not do again, " says Mike.

The best advice Mike gives to people interested in this sport is to get instruction, "don't do as I did, it's not the safest way."

freedom,"... Mike McSwain

A Quilting Heritage...

From North Carolina to Virginia and back to North Carolina again, Brenda Collier has made her pilgrimage. Along with her comes a talent handed down from mother to daughter. Brenda's mother, who now lives in Polkville, makes quilts. She has passed on her knowledge, secrets, and some of her patterns to her daughter.

Brenda is a recent graduate of Business Administration and Accounting at CCC. She is also a mother of five children who enjoys making quilts. She borrows many of her patterns from books and, of course, her mother. Brenda shares her talent by making baby quilts as gifts. "I love doing things for people."

A quilting heritage - passed down and shared with future generations.

Keith West does...

Do you believe in magic?

In fact, Keith believes so much in magic, he has made it part of his life. Influenced by the Great Houdini and David Copperfield, Keith takes his magic wand, cards, or whatever else he wished to use and entertains at birthday parties and benefits. "The Wizard" is Keith's stage name. And just like a wizard, he makes cards float in mid air. "I like entertaining people . . . especially children."

Keith is a Cleveland Community College student in the Electronics Program and he and his wife live in Kings Mountain. He has been a member of The Society of American Magicians for six years. Now in his second year of electronics, you might say Keith is a "Wiz" at what he does.

Reach for the moon...

Ken Vassey, CCC Electronics Instructor is also a telescope maker. He has been fascinated with telescopes since he was 14 year old, and in 1959 built his first telescope from a magazine article. In 1987 Ken purchased a 16" piece of glass from a fellow instructor and started building again. After 350 hours of grinding, he sent the glass to have a mirror surface put on it. In February, 1989, Ken saw "first light." He now owns a 16" telescope that weighs 300 pounds.

"I'm more of an amature telescope maker than an astronomer," says Ken, "but I love sharing it with people, especially kids. Half the fun is hearing other people's reaction when they look through the telescope."

Ken reaches for the moon, the stars, and all that heaven holds...not to pull them down from heaven, but to touch their wonder and majesty.

Jim Fite...woodcarver

Jim Fite is a highly motivated biology instructor at Cleveland Community College. But that is not where his talents end. Jim and his wife Polly like crafts and craft shows. For years Jim made crafts of all kinds, but was looking to do something a little more unique. Unique is certainly the word for Jim's current passion - woodcarving.

At a craft show some time back, Jim saw a hand carved horse and thought, "I can do that." And he did. "I use whatever kind of tool I think might do the job," Jim explains, "sometimes I use a router, sometimes I use a chisel. You just have to have a vision of what the end result will be and cut out all the wood that doesn't belong, the tools you use to get there aren't important."

Whether it's horses, rabbits or any of the other many items he carves, quality is the goal. - and Jim achieves it.

Karate...best exercise for mind and body

"I started gaining weight in the early seventies," says Woody Glenn, an instructor in the Business Administration program at Cleveland Community College, "and tried a number of things to help me control it. I was in the U.S. Air Force stationed in the Orient and became interested in karate. I found that karate was the best exercise for both the mind and body."

His dicipline is of the Japanese-American style and he is now a certified instructor and referee. Woody holds a fifth-degree black belt and is qualified to teach to the black belt level. On a part-time basis he operates the Shelby Martial Arts Studio as well as teaching some self-defense classes in the physical education program at CCC.

Woody teaches students to be individuals and leaders. " I want to teach students to have confidence, knowledge and respect. Karate is a great character builder. Taking one technique and build on it is what I like to do," says Woody, "I have gotten away from any totally traditional dicipline."

Woody works out 5-6 hours each week to keep in shape, and you'll have to agree it seems to work for him.

MIAMI
HURICANES

Baa Baa black sheep, have you any wool? . . .
Yes sir, yes sir, three bags full!

This old nursery rhyme took on a new ring for Laura Wells when her husband brought home 25 sheep. "Itsy," as she has been called all her life, was in a dilema. The only logical thing to do was spin and weave the wool. So, being mechanically minded, she bought a kit and put together a spinning wheel and loom. By using trial and error and books from the public library as her teacher, she set out to master the arts of spinning and weaving.

Itsy is a student at CCC with two grown children. When she's not in the classroom, she's behind the spinning wheel or a weaving loom. Though her work is not for sale, she does share it with her family and friends. Itsy estimates that she can make an Afgan in 6-9 weeks and five scarves in two weeks.

Nursing

CCC offers a Vocational Diploma in Practical Nursing. Upon completion of the curriculum, the student is prepared to take the National Council Licensure Examination required to be a licensed practical nurse. The student learns the five components of nursing set up by the North Carolina Nursing Practice Act, 1981.

(1) Participation in the assessment of the client's health, both physical and mental.

(2) Recording and reporting such assessment.

(3) Participating in the implementation of a prescribed health care plan.

(4) Reinforcement of counseling and instruction by licensed registered nurse, doctor, or dentist.

(5) Reporting and recording the care rendered and the client's response.

Practical nurses who have completed this curriculum and become licensed may pursue careers in hospitals, public health agencies, and doctor's offices.

Radiologic Technology

Cleveland Community College offers an Associate in Applied Science Degree in Radiologic Technology. This curriculum prepares the graduate for a career in Medical Radiology. Graduates are prepared to take the national examination given by the American Registry of Radiologic Technologists. Successful completion of the exam enables students to pursue employment in the Radiology departments of hospitals, clinics, physicians offices and medical laboratories.

Students learn such skills as radiation protection, accurate anatomical positioning, patient care, and emergency care.

Machinist

The Machinist curriculum at CCC offers the individual the opportunity to acquire basic skills and information necessary for employment in the metalworking industry.

Upon completion of the curriculum, the machinist is able to select the proper materials and tools for each job. The machinist also understands the developmental stages of a project for completion according to blueprints or written specifications.

Courses include Machinist Blueprint Reading, Applied Physics, and Machine Shop Theory and Practices.

Welding

The welding curriculum at CCC prepares the student for employment in many different industries. Among these are automotive, heavy equipment, aircraft, and production jobs.

Students gain a kn owledge of the essential techniques and skills necessary for employment in the field of welding and metals industry. The job of the welder is to apply extreme heat and pressure to intersecting metals in order to form a permanent bond.

Various types of welding and their appropriate application are studied throughout this course.

Cleveland Community College Orchestra

"During the summer of 1990 a group of musicians, discussing the musical talent centered around this area, formed an idea of having an orchestra based in Shelby.

The potential members were most interested. Now we needed a place for the many necessary rehearsals. Dr. L. Steve Thornburg, president of Cleveland Community College, was approached about the possibility of using College facilities. He was very enthusiastic despite the fact that he felt a true music department for the College was still several years away. A rehearsal area was found by Dr. Dottie McIntyre, associate vice president of College Relations, and our first practice was August 23, 1990. We were asked about giving a concert in December 1990, but felt that the band was not quite ready. On January 10, 1991, we gave our first performance, a very successful concert. A number of dances and concerts have been performed since then and we have several more scheduled in the coming months.

Band members who attend our weekly rehearsals are enthusiastic and dedicated and enjoy the opportunity to bring back the 'Big Band' style of music."

CCC Employees and Students enjoy a close working relationship...

At CCC, students have the opportunity to pursue academic excellence using the latest technology.....

Campus Events

Cleveland
COMMUNITY COLLEGE
Go For It!

In April, 1990, the Board of Trustees of Cleveland Community College officially appointed Dr. L. Steve Thornburg to succeed the retiring Dr. James B. Petty as president of the college. The State Board of Community Colleges formally approved him in May. Dr. Thornburg took over the presidency August 1, 1990.

Dr. Thornburg came here from Bangor, Maine, where he was president of Eastern Maine Technical College. He had been president there since 1988.

"Cleveland Community College offers me a wonderful professional opportunity and the possibility for returning home. Not just home to North Carolina and a dynamic community college system, but home to an area in which I grew up," Thornburg said.

A Lincolnton native and graduate of Lincolnton High School, Thornburg attended the University of North Carolina at Chapel Hill and received his doctorate from North Carolina State University. For five years he served as the director of the Lincoln County campus of Gaston College.

Of the more than 100 applicants for the job, the board of trustees said that they believe they secured the best candidate for our college and our community.

August, 1991, will mark one year that Dr. Thornburg has been president of Cleveland Community College. The leadership that he has provided during this time has been truly inspirational to the students, faculty and staff and everyone is looking forward to the future growth of our college.

"Cleveland Community College provides an opportunity for Cleveland County people to achieve their educational goals and aspirations. The college is a means for our citizens to improve the quality of their lives," says Dr. Thornburg.

Dr. Thornburg is married to the former Margaret A. "Peg" DeChant. They have no children. Their home is on Vauxhall Drive in Shelby.

As hobbies, Dr. Thornburg enjoys golf, racquetball, tennis, hiking, reading and woodworking.

The students, faculty and staff take this opportunity to welcome the Thornburgs into our family at Cleveland Community College. Welcome home!

Dr. L. Steve Thornburg
and
Margaret A. "Peg" Thornburg

The President and First Lady

Faculty marched and sat together, wearing their caps and gowns.

The Inauguration of Dr. L. Steve Thornburg

On this and the following four pages you will find a photographic history of the inauguration of Dr. L. Steve Thornburg as President of Cleveland Community College. This event and the ball that followed took place on Thursday, April 25, 1991.

Many events took place during "inaugural month", and all school employees participated in some way to help make the inauguration a tremendous success.

Dr. Thornburg is only the second president our school has ever had and this was the first inauguration to take place. We think you will find that it was a most enjoyable and memorable event.

Robert W. Scott, President of the North Carolina Community College System presented the challenge to the president and the community (above) and assisted John F. Schenck, III with the installation of the president. (left)

Peg Thornburg watches proud moment.

Dr. Thornburg (bottom and right) formally accepts the presidency and makes a point with the medallion, a silver impression of the official seal of Cleveland Community College.

Anne Goss, Choral Director at Burns Middle and High School with Dorothy A. Young as accompanist (below) presented several songs. Other music was provided by the Cleveland Community College Brass and Woodwind Ensemble.

Barbara Taylor leads the recessional.

The reception was prepared by our own Alex Alexander. (below)

The Inaugural Ball

Dr. and Mrs. Thornburg enjoy themselves at the North Lake Country Club during the Inaugural Ball. (right)

Music was provided by the Cleveland Community College Orchestra.

Amphitheater Dedication . . . .

On Wednesday, April 24, 1991, the James Broughton Petty Amphitheater was dedicated. The program participants were Dr. L. Steve Thornburg, CCC President, Dr. Bill Quarles, Arts and Sciences Instructor at CCC, John F. Schenck,III, Chairman of the CCC Board of Trustees, Joe E. Cabiness, Chairman of the Cleveland County Commissioners, Burns High School student Vanessa Vincent, The Shelby High School Symphonic Band (Pat Mason, Director), and special guest Dr. James Broughton Petty, CCC President Emeritus.

(far right) Vanessa Vincent, Burns High School student, sings the national anthem.

(right)Dr. Thornburg made the opening remarks and welcomed our guests.

(below) The Shelby High School Symphonic Band provided the first entertainment in the new amphitheater.

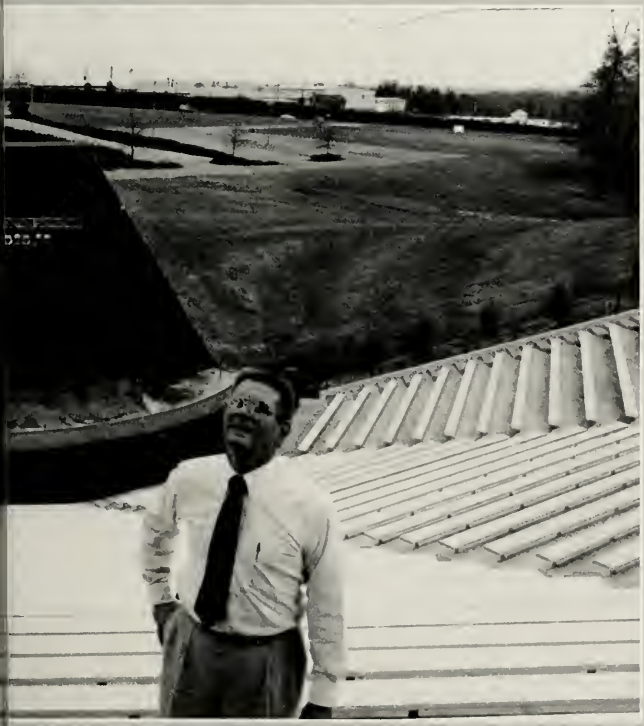
Dr. James Broughton Petty, President Emeritus of Cleveland Community College (left and below)spoke of the challenges ahead for CCC and thanked everyone for the honors that were bestowed on him.

We think Jerri is going steady but she has such a subtle way of showing off her ring that we're not sure.

Tiffany and Viona points out the guy that put all the hickies on Tiffany's neck.

Potpourri....

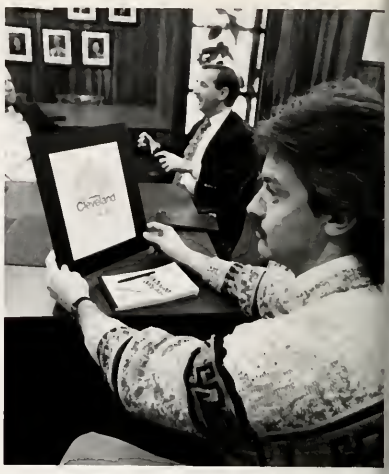
We don't know if Tonya and Jenny are thinking or wasting their minds. Of course it could be dancing.



CCC's new cheerleaders, Dottie and Linda, show true school spirit.....yea!

Jimmy had to move in closer to speak to the group on the back row (must be Baptists). Looks like you're a lot closer to heaven from there, Jimmy!

Student Leadership Week



Allan Carter, a liberal arts pre-business student, worked with CCC president Dr. L. Steve Thornburg.

Working with executive vice-president Dr. Noel Lykins is Sean Mintz, an electronics engineering technology student.

Julie Caldwell, a fashion merchandising student was assigned to Dr. Dorothy McIntyre, associate vice-president of Communications and Development. Here they are working with Stuart LeGrand, a member of the CCC board of trustees on plans for the presidential inauguration.

Cleveland Community College's Student Government Association sponsored "Student Leadership Week" in January, 1991. CCC students spent two to four hours observing and shadowing a selected administrator and then assumed the responsibilities of that position for a few hours.

Working with Ed White, vice-president of Academic Affairs, is Donna Hines, a pre-liberal arts student.

Sean Little, a criminal justice student worked with Joe Hamrick, vice-president of SIndustry and Community Service.

Assigned to Jimmy Greene, vice-president of Business Affairs, was Tina Pruitt, an accounting student. Here they talk with Lydia McSwain, CCC bookstore manager.

Sammy Johns and Stan Hardin put on a great show for the students. It really helped boost morale.

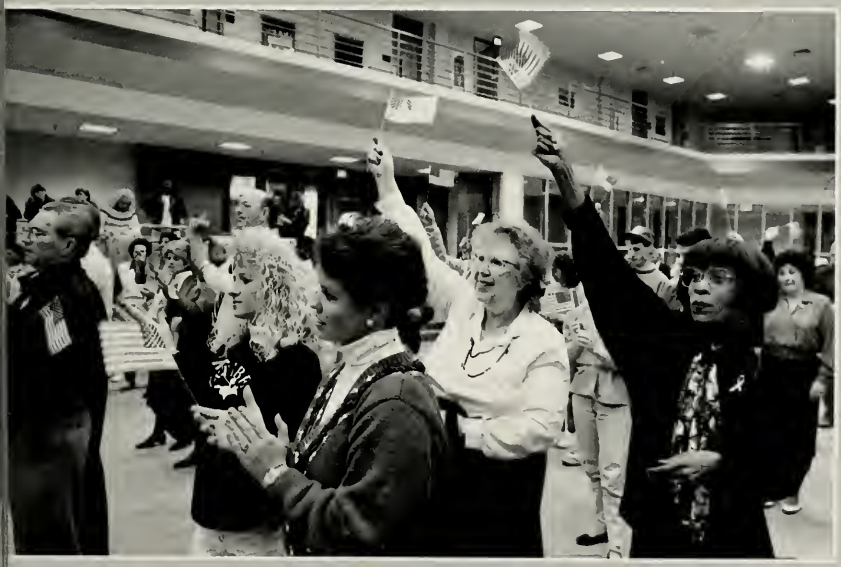
Support the Troops Rally.....

In late January, 1991, CCC's Student Government Association and Gamma Beta Phi honor society sponsored a military support rally, held in the gym, and attended by about 250 students and faculty to show support for the troops in the middle east.

Jonathan Ley, a CCC student, was honored. He was about to leave for Saudi Arabia.

Singer / songwriter Sammy Johns, along with Dr. Stan Hardin and Deller Simms sang "Tie A Yellow Ribbon," "America, The Beautiful," The Battle Hymn of the Republic, and"The Star-Spangled Banner."

We know that's you Pam.



Faculty and students respond with waving flags, whistles and cheers!

Patriotism was everywhere.

Le Club de Esprit helps raise spirits around the CCC campus on Valentines Day. For only one dollar you can send a cupcake, some candy and a card to someone special. This club sponsored event helps raise money for their annual New York City trip.

Save me a bite Tonya!

The SGA also threw a bash for students and faculty. (below)

Valentines

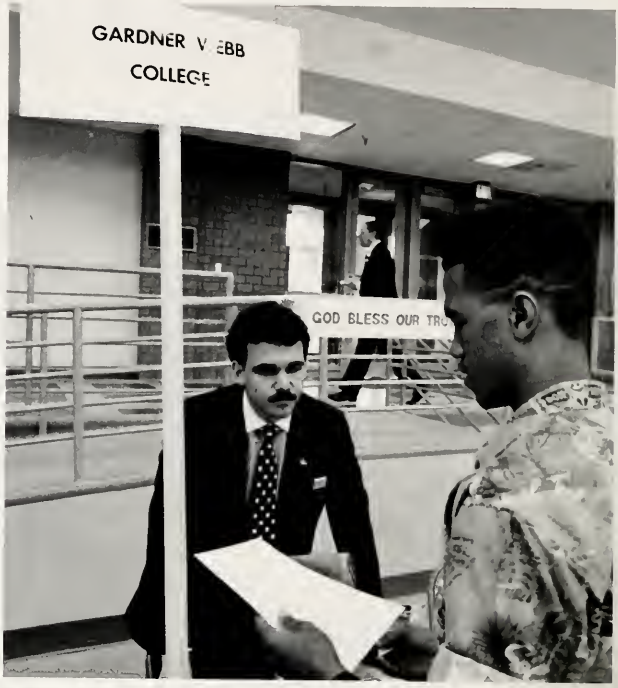
How many bags full did you say you needed Phyllis?

Can you really leave out the calories?

Yes, I'll be your Valentine, Becky. (below)

Day 1991

A lot of information was disseminated and a lot of decisions were made.



The gymnasium was a great place for this event. It was easy and simple to see all the participants.

College Transfer Day

On February 7, 1991, the gymnasium of Cleveland Community College was the site for "College Transfer Day." Representatives from North and South Carolina colleges and universities were here to talk with students interested in transferring to a four-year school. Students and faculty were given the opportunity to ask questions and receive information about courses that are transferrable to other schools.

Student Services hosted this event which was coordinated by Carolinas' Association of Collegiate Registrars and Admissions Officers (CACRAO).

Some students had more fun doing their research than others did.

Students seemed well prepared with questions, especially about curriculum.

Tech Prep...

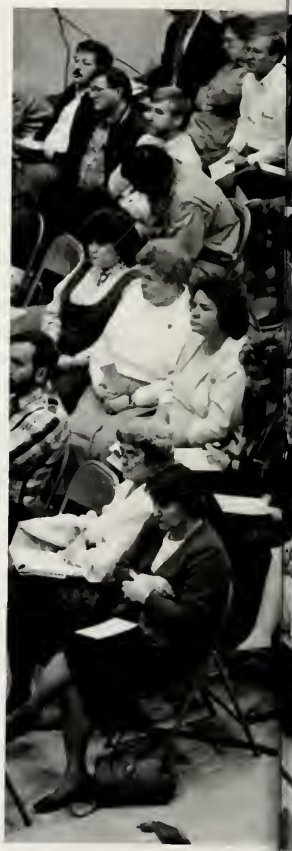
On March 18, 1991, Cleveland Community Collegehosted the Cleveland County kick-off of the Tech Prep Program. High school and middle school teachers, counselors, and principals from throughout Cleveland County along with area business and civic leaders gathered for the event.

Dr. M. Douglas James, Superintendent of Richmond County (N.C.) Schools, and a member of the Tech Prep Steering Committee, was the keynote speaker for the kick-off. Dr. James, who initiated the program in 1986 in Richmond County, explained that the high school tech prep curriculum emphasizes "advanced communications, mathematical, scientific and technological knowledge and skill development coupled with appropriate hands-on expierences."

Tech prep is a program designed to serve the majority of high school students who take part in neither college prep nor vocational tracks. The program is designed to work similarly to traditional college prep programs.

With this program, students who have an interest or perhaps an aptitude for advanced technical training would be encouraged to enroll in a program to prepare them for more advanced training at a community college after they graduate from high school. This program would require a very close working relationship between high schools and local community colleges.

Cleveland Community College is proud to be at the forefront of this exciting new concept. We expect to help high school students make a smooth transition to our campus.



Dr. James (left and above) makes his point at the Tech Prep kick-off.

The Tech Prep kick-off event was well attended by a large representation of professional educators.

1991 Spring Feed....

The SGA did it again! Another successful pig out...but with hamburgers this time. The day classes had the distinct advantage this time since the night classes had to move inside due to rain. Of course the faculty can't blame their loss in the softball game on the rain....maybe in the fall.

Now that we have him caged, what do we do with him?

HEY! The volleyball's over here you guys.....

SGA Officers: (L-R) Lisa Palmer, Sec.; Andrea Hoskins, Treas.; Jerri Anderson, VP; Chris Cartee, President.

Where did you learn to play ping pong with your eyes closed, Pam.

Peggy Oates showes her considerable atheletic prowess on the softball field....too bad the rest of the faculty wasn't quite as good.

Students and faculty dig in. They kept the cooks working overtime.

Seems that the students had one advantage on the faculty....youth!

Wilbur demonstrrates batting strategy that helped give the student team the edge...youth and ability only played a small part.

Danny Scruggs gives an example of megabyte-or is that megabite?

Music just seems to run in the family, huh Lee?

more spring feed fun.....

That's a really strange birthmark Jackie!

Look out Hardees and McDonalds, we've invented the Joebuck burger!

The night classes didn't mind eating inside. At least they had tables to sit at while they listened to the rain falling on the roof.

State Convention, Raleigh, N.C., 1990

Freedom Fest Fund Raiser, July 4, 1990

Livermush Festival Fund Raiser, downtown Shelby

Christmas party for Shelter Home and James Home Children

Service project: Angel Tree for underprivileged children

Sponsors two patients at Western Carolina Center

Gamma Beta Phi.....

1990-1991 OFFICERS - (L-R kneeling) Barbara Taylor (Advisor), Rena Queen , Reporter; Jackie McDaniel, Vice President; Paula Leonhardt, Corresponding Secretary. (Back row) Barbara Newton, President; Susan Elliott, Newsletter Editor; Karen Greer, Historian; Peggy Wuest, Recording Secretary.

OBJECTIVES:

To recognize and encourage excellence in education

To promote the development of leadership ability and character in its members

To foster, disseminate, and improve education through appropriate service projects

The Gamma Beta Phi Honor Soxiety is a national organization that was chartered locally on March 21, 1977. Membership requirements are a 3.50 grade point average after completion of 15 quarter hours. Invitations are extended twice a year. The objectives of the Cleveland Community College chapter are to recognize and encourage excellence in education, to promote the development of leadership ability and character in its members, and improve education through school and community service projects. The advisors are Barbara Taylor and Buck Walker.

Gamma Beta Phi new members meeting.

Le Club de Esprit.....

Le Club de Esprit is comprised of students within the Fashion Merchandising and Marketing curriculum. Numbered among this clubs many activities are visits to the Carolina-Virginia Mart and Men's Apparel Club in Charlotte, N.C., to the Atlanta Merchandise Mart, Atlanta, Ga., and the Garmet District in New York City, and area industries that are related to fashion. Students are involved in fund raising projects such as car washes, bake sales, and a yearly fashion show.

Fashion students work together on stage props for an upcoming fashion show.

Club members get the chance to try on and show off the latest styles at their annual fashion show.

The fashion show this year was a big success. The latest styles were exhibited ...and with lots of flair!

Before any successful show, students must first get lots of practice putting styles together on mannequins.

Pictured at right are club members (L-R) Joyce Brooks, Sabrina Lawrence, Melissa Lawrence, Rachael Archie, Linda Ross (advisor), and Annette Hopper.

Jerome Scott (below) deliverd a program on Rev.Martin Luther King.

Black Awareness Club.....

The Black Awareness Club is a campus organization whose purpose is to promote a better understanding of contributions of Black Americans through service and scholarship.

Each year the club sponsors campus-wide events during Black Awareness Week. The clubs advisor is Linda Ross.

At left, the audience participates in singing during a program about Rev. Martin Luther King. In the photo below, John O'Neal , playwright, actor and stage director, presents "You Can't Judge A Book By Looking At The Cover: Sayings From The Life And Writings Of Junebug Jabbo Jones."

Who's Who AMONG STUDENTS IN American Junior Colleges

This is to certify that

has been elected to
Who's Who Among Students in
American Junior Colleges
in recognition of outstanding merit and
accomplishment as a student at

CLEVELAND COMMUNITY COLLEGE

Director

Nominees for Who's Who Among Students in American Junior Colleges are selected by a committee of faculty and administrators. These nominees are second year students enrolled in a two-year program; in addition, they have exhibited superior academic achievement and are active in both extracurricular and community activities. Cleveland Community College has 39 nominees for the academic year 1990-1991. We congratulate these students on being selected to receive this high honor.

Kyrin Packard....Visiting Artist

Kyrin Packard, Visiting Artist for the 1990-1991 school year, said farewell this summer. Kyrin's dynamic personality will be greatly missed at CCC. Kyrin came to us in the 1989-1990 school year and has completed her two year tenure. Kyrin received her B.A. from the University of North Carolina and the Graduate Theater Program at California State University. She has performed and toured extensively with the San Gabriel Performing Arts Company, the L.A. Acting Company and Theatre Rapport in Hollywood.

The Visiting Artist Program was established in 1971 as a co-operative effort of the North Carolina Arts Council and the Department of Community Colleges. The only program of its kind in the nation, its purpose is to heighten the awareness and cultivation of all art forms through interaction between professional artists and the communities they serve.

1991 Annual Staff

The 1991 Bridge will be the last yearbook produced by the Cleveland Community College annual staff. Producing the Bridge hasn't always been easy. Frankly it's been a lot of work. However, it's always been a great thrill to see the book come together and get your reactions to what we put in it.

In the spring of 1992 you will have something new...a magazine! We expect to publish a 32-page magazine each spring and fall with at least 8 pages of color photographs and articles that will be of interest to students, faculty and staff, and alumni. If you have ideas for articles please let us know, or better yet, if you have writing skills send us a story.

Pictured here are yearbook advisor Steve Martin and staff member Teresa Jackson.
